Professional Experience

AI Platform Engineer (Cloud Infrastructure)

Jul 2025 – Present

SITA (*Société Internationale de Télécommunications Aéronautiques*)

Gurgaon, India

- Developed **enterprise AI agents** using Microsoft Copilot Studio and the **MCP framework** to automate ServiceNow workflows, reducing operational overhead by **40%** through intelligent request orchestration.
- Architected an **Azure subscription vending platform** using **Terraform and Python**, automating provisioning of secure landing zones with integrated RBAC, Azure Policies, and governance controls.
- Built **AI-driven workflows** using Power Apps and Power Automate to map user requests to cloud infrastructure actions, streamlining resource lifecycle management across global airport systems.

Software Developer Intern | *Backend & APIs*

Nov 2024 – Jun 2025

PHICSIT Pvt Ltd

New Delhi, India

- Enhanced system stability by **30%** through **asynchronous API refactoring** and led peer code reviews that reduced developer onboarding time by **25%**.

Technical Intern | *Data Structures & Algorithms*

Jul 2024 – Nov 2024

GeeksforGeeks (GFG)

Noida, India

- Optimized core algorithmic solutions, improving computational efficiency by **15%** and reducing production bug reports by **20%** through rigorous code auditing.

Technical Skills

AI & Orchestration: Microsoft Copilot Studio, MCP (Model Context Protocol), AI Agent Workflows, Azure OpenAI, LLM Integration, Prompt Engineering, ServiceNow AI Integration.

Cloud & Platform: Microsoft Azure (Subscription Vending, Landing Zones, Entra ID, IAM), Azure Policies, Enterprise Governance, Resource Provider Automation.

Automation & IaC: Terraform (Modular Design), Python (Automation Scripts), RESTful APIs, CI/CD (Azure DevOps Pipelines, GitHub Actions), Git, Linux, Agile/Scrum.

Backend & Data: Node.js, JavaScript, Microservices, NoSQL Database Design (MongoDB).

Projects

InfraMind: AI Cloud Orchestration Simulator | *GitHub* | *Live*

- Developed an **NLP-driven Cloud Simulator** using **Streamlit and Python** that translates natural language into simulated Azure actions, generating real-time **Terraform/YAML** configurations.
- Engineered an intelligent **Assistant Bot** and **Query Engine** to analyze infrastructure state and provide instant IaaS/PaaS technical insights via a custom-built Knowledge Base.
- Built an interactive **Operations Dashboard** for resource lifecycle tracking, reducing the need for manual CLI configurations through intuitive conversational AI interfaces.

BeautyBuzz: AI Cosmetic Vision Web-App | *GitHub* | *Live*

- Engineered a real-time virtual makeover tool using **CNNs and OpenCV** for facial landmark detection, implementing a recommendation engine that boosted user engagement by **25%**.
- Deployed a scalable **Streamlit** interface integrating personalized logic based on skin tone and budget analysis to optimize user-centric cosmetic overlays.

Education

Guru Gobind Singh Indraprastha University

2021 – 2025

Bachelor of Technology in Information Technology

CGPA: 9.5/10

Leadership & Achievements

- AWS Community Builder & Technical Mentor:** Recognized by AWS for contributions to the global Cloud/AI ecosystem; provided architectural guidance on **Azure/AWS platform best practices** and **LLM deployments** to **1,000+** developers nationwide.
- Hackathon Judge:** Invited to evaluate **1000+ technical projects** across **40+ hackathons**, assessing AI/ML feasibility, cloud scalability, and architectural robustness for emerging developer solutions.
